re: OU 1 Wetlands Mitigation

Dear Mr. Lockhart:

During construction of the French Drain, EPA visited the site for the purpose of examining expected wetland disturbances and discussing mitigation. As a Federal agency, DOE is held to a very high standard in this regard by statute and Executive Order. After several rounds of additional discussions, we were pleased to receive the plan for reestablishing the wetland below Building 881 (92-DOE-7720); our signed concurrence with this plan is attached.

Our only additional request as regards the wetland restoration is that DOE submit a brief, but detailed revegetation plan for the restored area for our approval prior to completion of construction. Your letter only mentions cottonwood seedlings, and other trees. We feel it is important to quickly reestablish other appropriate vegetation in the area. We would like to know where, how, and how much replanting is to be done. This information must be submitted on or before August 28, 1992. We urge you to discuss the details of the revegetation effort with EPA prior to submittal in order to expedite approval; please contact Bill Fraser (EPA) at 294-1081.

Sincerely,

Martin Hestmark, EPA
Manager
Rocky Flats Project
